

Every enquiry
you don't answer
costs you money.

AI-POWERED ELEVATED PATIENT COMMUNICATION FOR PLASTIC SURGEONS

**The question was simple.
The answer took three days.
The patient didn't wait three days.**

CARECONCIERGE

AI-POWERED ELEVATED PATIENT COMMUNICATION FOR PLASTIC SURGEONS

A\$1.78 billion plastic surgery market. One decisive advantage: who responds first.

A\$1.78B

Market value in 2024

Growing to A\$3.94B by 2033 at 9.25% CAGR

~200

ASPS plastic surgeons in Australia

A tight, referral-driven market.

No dominant player.

First.

Mover wins the consultation

The practice that responds first wins in the majority of elective surgery enquiries. Speed is the differentiator AHPRA can't restrict.

The competitive edge is no longer advertising.

AHPRA now tightly restricts what you can say and how you can say it. The edge belongs to whoever responds fastest, most intelligently, at any hour.

The advertising rulebook changed in 2025. Most practices are still marketing like it didn't.

What AHPRA now restricts

- Single 'outcome' images — including unrelated patient photos on your website
- Patient testimonials in any advertising format, including social media
- Discounts, limited offers, or BNPL schemes as inducements to book
- Exploitative language: 'mummy makeover', 'problem areas', 'bingo wings'
- The title 'surgeon' unless you hold specialist registration
- Before-and-after photos with filters, emojis, or unrealistic framing
- Advertising to under-18s without strict age-gating

***AHPRA is now conducting proactive advertising audits.
Non-compliance creates direct liability.***

What this means for your practice

Ad spend is harder to justify.

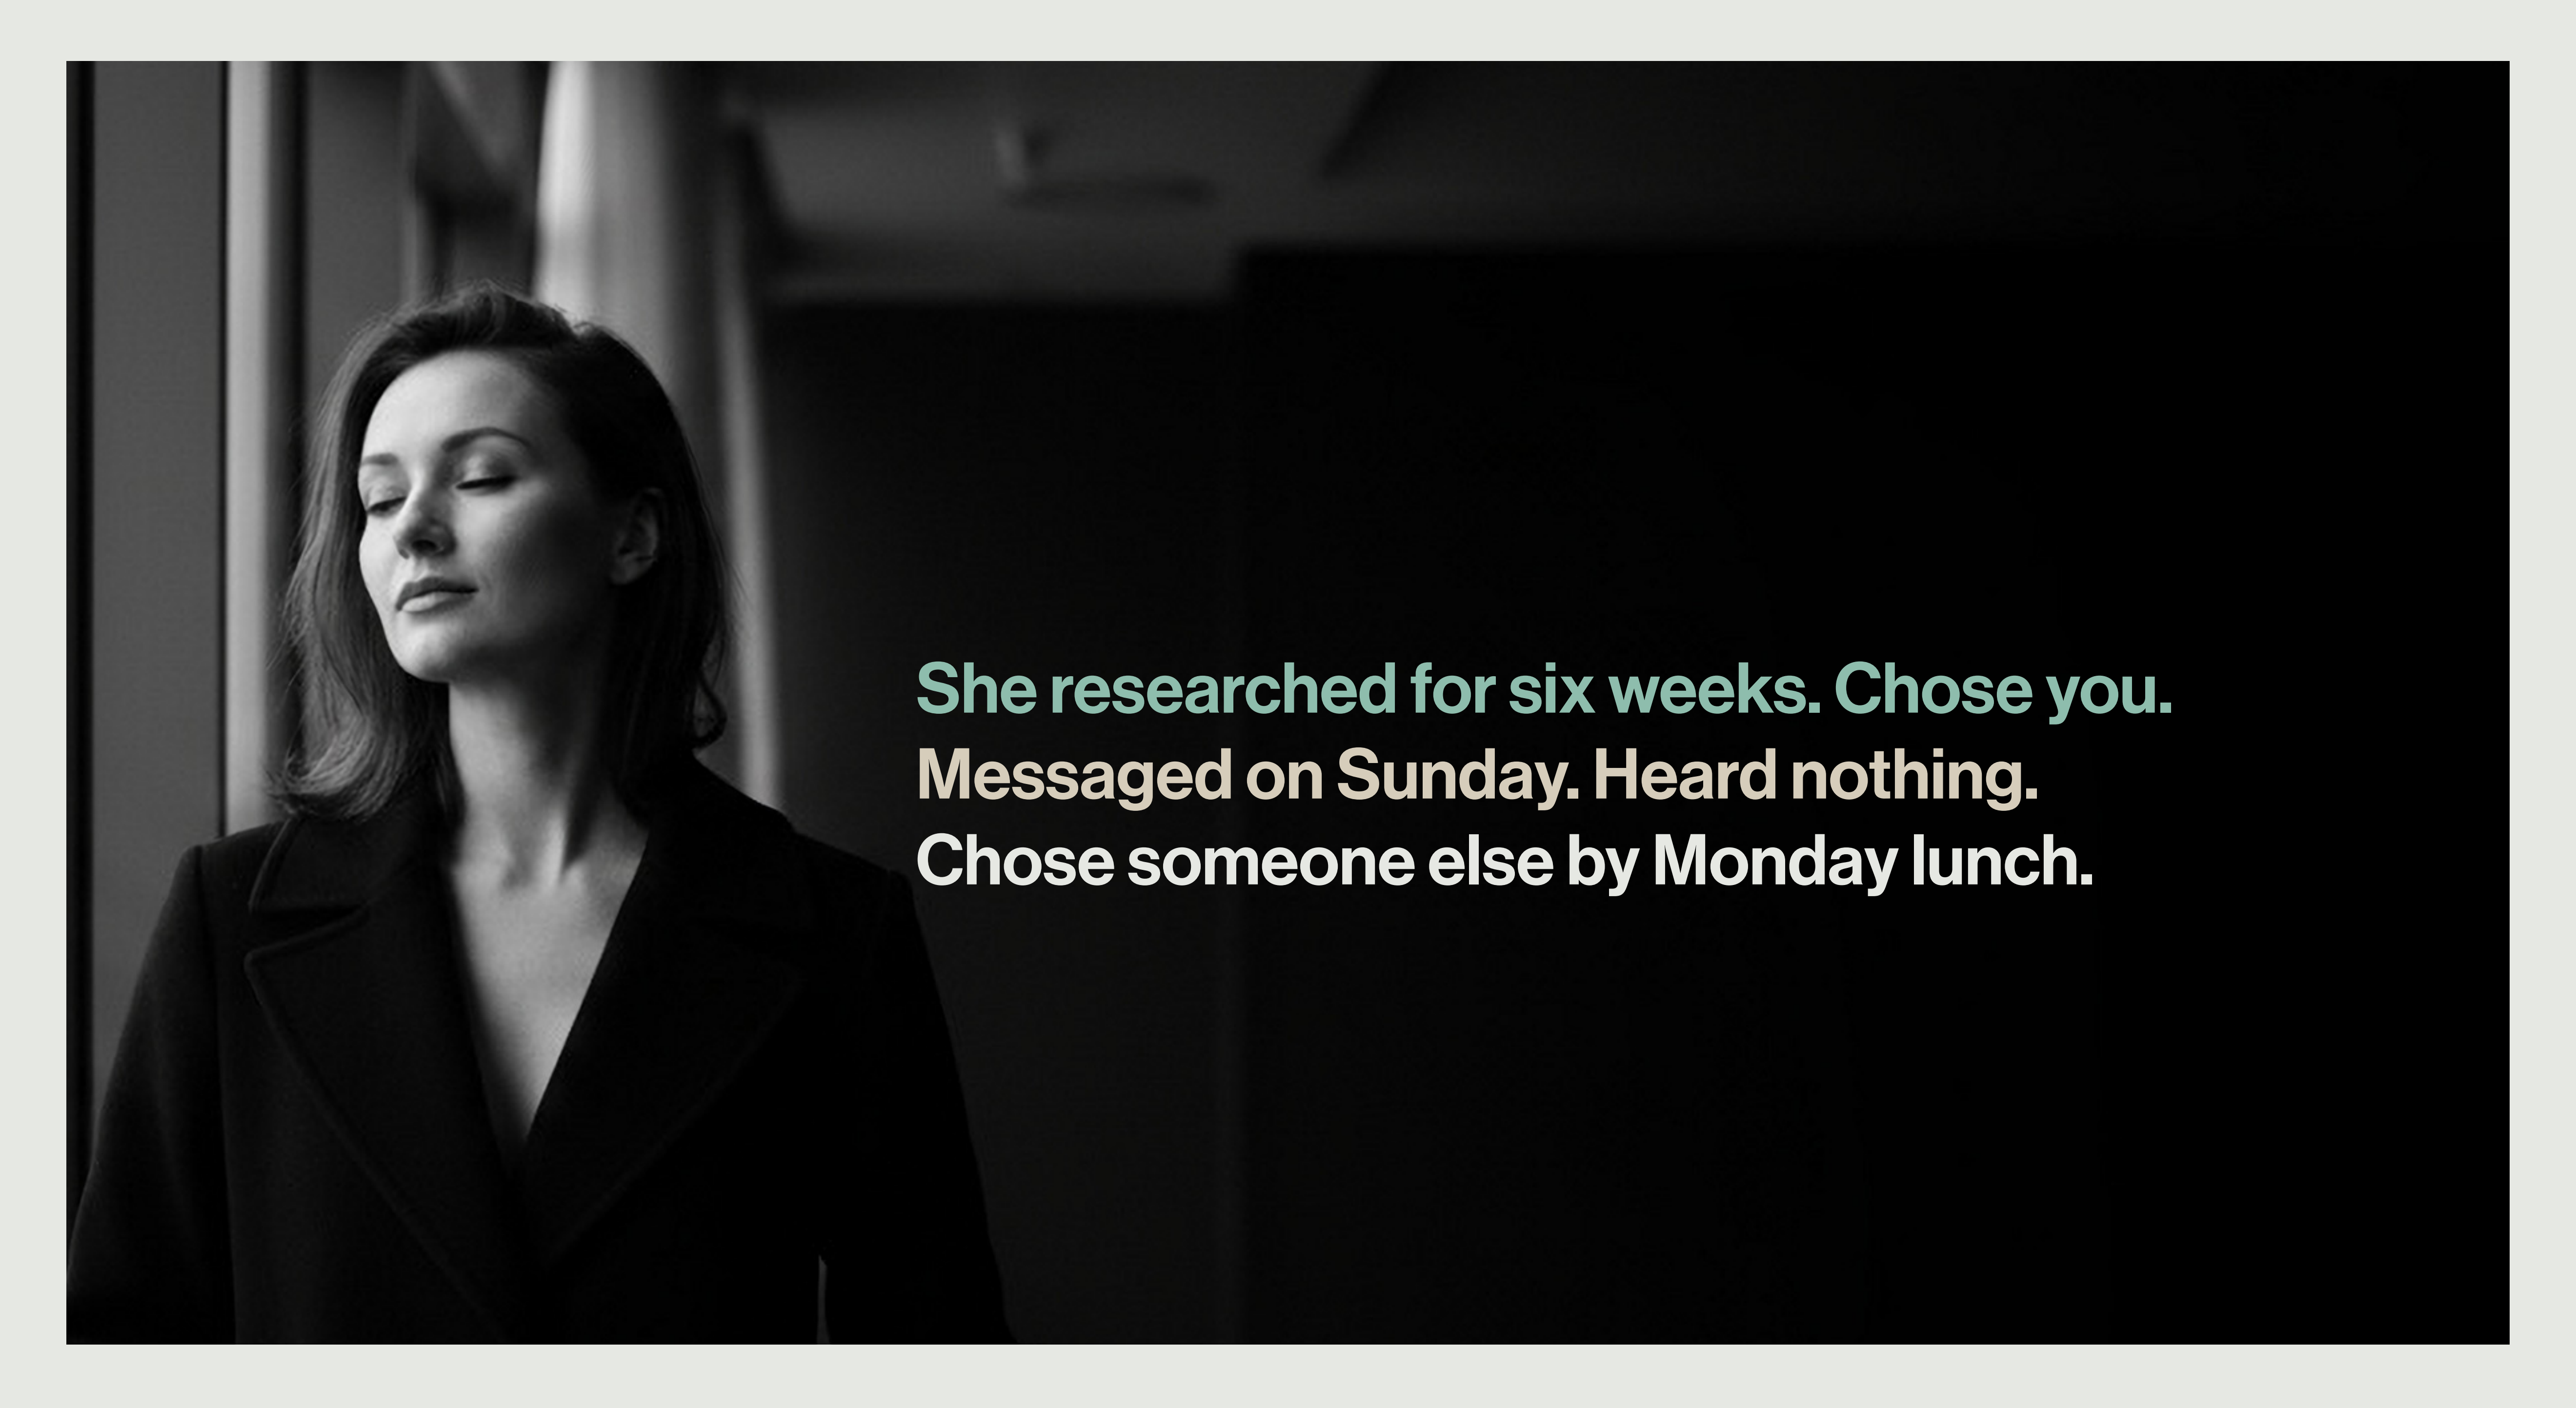

When every creative asset is restricted, awareness-only campaigns don't convert. You are paying for attention you can't act on.

Your first response is now your marketing.

AHPRA has removed most of the tools that create consideration. Your reply to an enquiry — how fast it arrives, how well it reads, whether it qualifies the patient — is the differentiator.

CareConcierge is built for this environment.

Every response is built from your AHPRA-reviewed practice content. No testimonials. No restricted language. No exploitative framing. Compliant by design.

**She researched for six weeks. Chose you.
Messaged on Sunday. Heard nothing.
Chose someone else by Monday lunch.**

The enquiry that arrives at 7pm Friday is your competitor’s patient by 9am Monday.

A\$15,000+ Average case value for a surgical plastic surgery procedure A\$3M+ in unconverted opportunity for a mid-size practice losing 4–5 leads per week after hours	7:00 PM · Friday Enquiry arrives. Practice is closed. A prospective rhinoplasty patient messages your practice. Nobody responds. By 9am Monday they’ve booked with a competitor who replied at 11pm.	Monday morning They don’t always ring back. The practice that responds first wins the consultation. Weekend enquiries convert at higher rates — the patient has had time to decide and is ready to act.	Every week This is not a one-off. A practice on 15 enquiries/ week with 30% after-hours traffic loses 4–5 leads every seven days. That compounds directly into practice value.	
--	---	--	---	--

You're paying A\$90,000 a year for a coordinator. They're spending 85% of their time on questions a machine can answer in four seconds.

What a patient coordinator actually costs

Base salary	A\$65,000–73,000 / yr
Superannuation (12%)	+A\$7,800–8,760
Leave loading + entitlements	+A\$3,500–5,000
Recruitment and onboarding	+A\$4,000–8,000

Total: approx.
A\$80,000–95,000 per year.

That assumes they answer the phone.
Weekend coverage requires additional staff — or it doesn't happen.

Where their time actually goes

- ~40% Answering repetitive FAQ enquiries
Pricing, procedure info, recovery times. Answers that never change
- ~25% Chasing leads that went cold
Following up enquiries that arrived after hours
- ~20% Data entry and admin
Logging enquiries, updating records, scheduling.
- ~15% High-value patient conversations
The only work that genuinely requires a human

CareConcierge handles the 85%. Your coordinator focuses on the 15% they were hired to do.

Every enquiry answered. Every lead qualified.
Every handoff ready on your desk. While you're in theatre.

01.
Enquiry Arrives

WhatsApp · Web chat SMS ·
Instagram DM Any hour. Any
day.

02.
AI Responds

Immediate. Calibrated
to your tone, scope, and
AHPRA-compliant content.
Feels considered, not
automated.

03.
Lead Triage

Genuine enquiries
separated from noise
before any staff member is
involved. The AI qualifies.

04.
Human Handoff

At the decision-ready
moment, your coordinator
receives a warm, detailed
handoff — not a cold form.

05.
Treatment Booked

Revenue that would have
gone cold is protected. The
system works while you
operate.

24/7/365

after-hours coverage

AHPRA-aware

no restricted language, ever

Purpose-built

for elective surgical practices

From A\$2,950

per month

“We had considered hiring weekend staff purely to cover the after-hours enquiry volume. CareConcierge solved that problem entirely.”

Dr Pouria Moradi, ASPS Specialist Plastic Surgeon, Sydney

ASPS practice. Running live. Here's what changed.

What changed at the practice

Staff freed from FAQ admin

The team was spending significant time on repetitive enquiries about pricing, procedures, and availability. That workload now routes to AI before any human is involved.

After-hours leads captured — not lost

Every enquiry is now acknowledged immediately, qualified, and held for the coordinator with full context when they return to their desk.

Patients responded positively

Multiple patients commented on the quality and speed of the response — without knowing it wasn't a human. The impression of the practice was elevated before they ever met the team.

Investment: A\$2,950/month

Full platform. Every channel. 24/7 coverage. Monthly Conversion Intelligence Report. Setup on a 12-month commitment.

A\$2,950

Per month. All channels. Full setup.
Conversion Intelligence Report included.

Dr Pouria Moradi
Specialist Plastic Surgeon · Sydney

CareConcierge co-founder
and founding case study

One recovered surgical case per month covers the platform for the year. Most practices see that in the first twelve days.

	SETUP	MONTHLY	TERM	WHAT YOU GET
Practice Solo practice — entry point	A\$3,500	A\$1,450 / month (anchor tier)	12 months	Full setup, all channels, out-of-hours coverage, 30-day review, up to 400 AI conversations/month
Growth (Recommended) The primary offer	A\$5,500	A\$2,950 / month	12 months	Everything in Practice, monthly Conversion Intelligence Report, lead nurture sequences, quarterly strategy session, up to 800 AI conversations/month
Elite High-volume or multi-site	From A\$7,500	From A\$4,500 / month	Custom	Everything in Growth, dedicated account manager, custom AI training per procedure, unlimited AI conversations

You're live in three weeks. Nothing changes for your team — except the enquiries stop going cold.

01. CRAWL

Weeks 1–3

30-minute intake interview.

We run a structured Zoom call with your team. We ask the questions — you don't need to prepare a brief. From that conversation we build your AI knowledge base: services, pricing parameters, tone of voice, escalation rules, and every FAQ your team currently answers by hand.

No changes to your PMS, your CRM, or your reception workflow.

02. WALK

Months 1–3

Live system. Real data.

The AI handles enquiries across your configured channels. Your team receives only vetted, qualified leads. We run a 30-day review together: what's working, what needs refining, what the data shows.

Deliberately intentional. We learn how your practice actually runs before proposing anything more.

03. RUN

Month 3 onwards

Managed optimisation.

Monthly performance review and script refinement. Conversion tracking from enquiry through to consultation and treatment start. Optional expansion to additional channels. Lapsed patient reactivation when you are ready.

“Isn’t this just a chatbot?” No. Here’s the distinction worth understanding.

It’s the first question every surgeon asks. And it’s the right one.

A chatbot

A decision tree.

Scripted paths. Scripted answers. If a patient asks something outside the designed route, they hit a wall: “I’m sorry, I don’t understand your question.” The conversation ends. The lead is gone.

Optimised to deflect.

Feels like a FAQ page that talks.

CareConcierge

A conversational agent.

It has one goal: booking a consultation. Everything else serves that. If a patient goes off-script, it answers and steers them forward. The conversation never hits a wall.

Optimised to convert.

Feels like your best coordinator.
At 11pm on a Sunday.

The guardrails are clinical, not conversational.

Every response is built from your AHPRA-reviewed practice content. CareConcierge will never speculate about surgical outcomes, quote fees out of context, or use restricted language. The intelligence is real. The compliance is absolute.

Your most valuable patients already know you. They just went quiet.

Every practice has them. Patients who enquired, requested a consultation, showed genuine intent — and then went silent. Not because they chose someone else. Because life got in the way, the timing wasn't right, or nobody followed up before the moment passed. They are sitting in your system right now. Warm, qualified, and waiting to be asked again.

What CareConcierge does with them

A structured reactivation sequence runs automatically to your lapsed patient list — personalised, compliant, calibrated to your tone. Not a bulk email blast. A considered conversation that picks up where you left off.

“We haven’t heard from you in a while. Your consultation is still available whenever you’re ready. Here’s how to get back in touch.”

These patients have already chosen you. They’ve done the research. The barrier to re-engagement is low — but only if someone reaches out. CareConcierge does it automatically, at scale, without adding a single task to your team.

The maths are disproportionate.

A mid-size practice with 200 lapsed enquiries in the last 18 months, converting at 12% through reactivation, recovers 24 consultations.

At \$15,000+ average case value, that’s \$360,000 in protected revenue — already sitting in your system. Untouched.

CareConcierge finds it. While you’re in theatre.

We are taking ten practices this quarter. That is the entire first Australian cohort.

Direct access to the founding team

Greg, Oli, and Pouria — not a support queue. You have the principals.

Conversion Intelligence included from month one

Every month you receive a full report: enquiries handled, consultations generated, estimated revenue protected.

Your practice shapes the product

Feedback from the first ten directly informs the platform roadmap. You are building this with us.

A credentialed ASPS co-founder as your peer reference

Dr Pouria Moradi is available for direct, peer-to-peer conversations. No sales pitch. Surgeon to surgeon.

Schedule your consultation

A 30-minute conversation. No obligation, no pitch deck to sit through. We ask about your current enquiry flow, explain exactly what the system does and doesn't do, and you decide.

Schedule a Meeting

<https://calendly.com/greg-careconcierge/30min>

A woman with long dark hair is sitting on a bed in a dimly lit room at night. She is wearing a dark turtleneck sweater and dark pants. She is holding a smartphone in her right hand and looking at it with a slight smile. Her left hand is resting on her lap. The room is dark, with light coming from a window on the left, showing a cityscape at night with a bright light source. The text is overlaid on the left side of the image.

**Your coordinator was at her daughter's netball game.
Her rhinoplasty enquiry was not.**
