

Every enquiry
you don't answer
costs you money.

AI-POWERED ELEVATED PATIENT COMMUNICATION FOR PLASTIC SURGEONS

**The question was simple.
The answer took three days.
The patient didn't wait three days.**

CARECONCIERGE

AI-POWERED ELEVATED PATIENT COMMUNICATION FOR PLASTIC SURGEONS

\$21 billion market. The largest in the world.
One decisive advantage: who responds first.

\$21.6B

US cosmetic surgery market in 2025

Growing to \$41.3B by 2034 at 7.4% CAGR. North America holds ~38% of global share. Demand remained steady through economic uncertainty — patients prioritise aesthetic health regardless of conditions.

7000+

ASPS board-certified plastic surgeons

The world's largest body of credentialed plastic surgeons. No dominant private-practice player. Most solo and small practices rely on a part-time coordinator — or handle enquiries themselves.

First.

Mover wins the consultation

The practice that responds first wins in the majority of elective surgery enquiries. Speed is the differentiator that the FTC, state medical boards, and HIPAA cannot restrict.

The competitive edge is no longer advertising.

FTC rules and state medical board guidance now restrict how practices present testimonials, before-and-afters, and promotional claims. The edge belongs to whoever responds fastest, most intelligently, at any hour.

The advertising rulebook tightened in 2024. Most practices are still marketing like it didn't.

What the FTC, HIPAA, and state medical boards now restrict

- Patient testimonials that do not reflect typical outcomes — regardless of whether they're real
- Before-and-after photos that are filtered, lit to advantage, or don't reflect average results
- Reviews or endorsements without clear disclosure of any material connection
- Paid influencer content without conspicuous #ad or sponsored disclosure
- Any claim not substantiated by "competent and reliable scientific evidence"
- Suppression of negative reviews — now a standalone FTC violation
- Use of patient images or data without HIPAA-compliant written consent

***FTC Consumer Reviews Rule went into effect October 21, 2024.
Civil penalties: \$51,744 per violation.***

What this means for your practice

Ad spend is harder to justify.

When every testimonial, before-and-after, and urgency hook is restricted or hedged, awareness-only campaigns struggle to convert. You are paying for attention you can't act on.

Your first response is now your marketing.

The regulators have removed most of the tools that create consideration before the enquiry arrives. How fast you reply, how well it reads, whether it qualifies the patient — that is the differentiator.

CareConcierge is built for this environment.

Every response is built from your reviewed practice content. No unsubstantiated claims. No restricted language. No HIPAA exposure. Compliant by design.

GLP-1 weight-loss drugs are sending a new wave of patients to plastic surgeons. Are you ready to catch them?

The Ozempic boom is a plastic surgery boom.

Rapid weight loss from GLP-1 medications is driving a significant increase in body contouring referrals — tummy tucks, body lifts, arm lifts, and facelifts to restore volume lost in the face. The ASPS reported facelift procedures rising as GLP-1 adoption accelerated in 2024.

This is a new patient cohort — motivated, ready, and researching online.

They are not waiting to be sold. They have already decided. They are looking for the practice that responds first with authority.

The unregulated market is eating your referrals.

Non-surgical aesthetics practitioners — medspas, injectors, and unlicensed “cosmetic surgeons” — operate with far fewer advertising restrictions. They can post unlimited before-and-afters, offer promotional pricing, and respond within minutes using call centres.

Board-certified plastic surgeons have the credential. They don’t always win the enquiry.

CareConcierge closes that gap. You match their speed. You exceed their quality. The patient gets the surgeon they deserve.

The enquiry that arrives at 7pm Friday is your competitor’s patient by 9am Monday.

In US private practice, enquiry management often falls on the surgeon. That's a \$600/hour problem.

What a patient coordinator actually costs

Base salary \$45,000–\$65,000 / yr

Employer payroll tax (FICA ~7.65%) +\$3,400–\$5,000

Health benefits contribution +\$6,000–\$12,000

Recruitment and onboarding +\$3,000–\$6,000

Total: approx.

\$57,000–\$88,000 per year.

And many US plastic surgeons have no dedicated coordinator at all. They handle it between cases — at the cost of clinical time worth far more.

Where their time actually goes

~40% Answering repetitive FAQ enquiries

Pricing, procedure info, recovery times. Answers that never change

~25% Chasing leads that went cold

Following up enquiries that arrived after hours

~20% Data entry and admin

Logging enquiries, updating records, scheduling.

~15% High-value patient conversations

The only work that genuinely requires a human

CareConcierge handles the 85%. Your coordinator focuses on the 15% they were hired to do.

Every enquiry answered. Every lead qualified.
Every handoff ready on your desk. While you're in theatre.

01.
Enquiry Arrives

WhatsApp · Web chat SMS ·
Instagram DM Any hour. Any
day.

02.
AI Responds

Immediate. Calibrated to
your tone, scope, and FTC/
HIPAA-compliant content.
Feels considered, not
automated.

03.
Lead Triage

Genuine enquiries
separated from noise
before any staff member is
involved. The AI qualifies.

04.
Human Handoff

At the decision-ready
moment, your coordinator
receives a warm, detailed
handoff — not a cold form.

05.
Treatment Booked

Revenue that would have
gone cold is protected. The
system works while you
operate.

24/7/365
after-hours coverage

FTC/HIPAA-aware
no restricted language, ever

Purpose-built
for elective surgical practices

From \$3,700
per month

“We had considered hiring weekend staff purely to cover the after-hours enquiry volume. CareConcierge solved that problem entirely.”

Dr Pouria Moradi, ASPS Specialist Plastic Surgeon, Sydney

ASPS practice. Running live. Here's what changed.

What changed at the practice

Staff freed from FAQ admin

The team was spending significant time on repetitive enquiries about pricing, procedures, and availability. That workload now routes to AI before any human is involved.

After-hours leads captured — not lost

Every enquiry is now acknowledged immediately, qualified, and held for the coordinator with full context when they return to their desk.

Patients responded positively

Multiple patients commented on the quality and speed of the response — without knowing it wasn't a human. The impression of the practice was elevated before they ever met the team.

Investment: \$3,700/month

Full platform. Every channel. 24/7 coverage. Monthly Conversion Intelligence Report. Setup on a 12-month commitment.

\$3,700

Per month. All channels. Full setup.
Conversion Intelligence Report included.

Dr Pouria Moradi
Specialist Plastic Surgeon · Sydney

CareConcierge co-founder
and founding case study

One recovered surgical case per month covers the platform for the year. Most practices see that in the first twelve days.

	SETUP	MONTHLY	TERM	WHAT YOU GET
Practice Solo practice — entry point	\$4,400	\$1,800 / month	12 months	Full setup, all channels, out-of-hours coverage, 30-day review, up to 400 AI conversations/month
Growth (Recommended) The primary offer	\$6,900	\$3,700 / month	12 months	Everything in Practice, plus: • Monthly Conversion Intelligence Report • Lead nurture for unconverted enquiries • Quarterly strategy session — founding team • Up to 800 AI conversations/month • FTC/HIPAA compliance monitoring
Elite High-volume or multi-site	From \$9,400	From \$5,600 / month	Custom	Everything in Growth, plus: • Dedicated account manager • Custom AI training per procedure • Competitor response benchmarking • Unlimited AI conversations • Priority access to new features

You're live in three weeks. Nothing changes for your team — except the inquiries stop going cold.

01. CRAWL

Weeks 1–3

30-minute intake interview.

We run a structured Zoom call with your team. We ask the questions — you don't need to prepare a brief. From that conversation we build your AI knowledge base: services, pricing parameters, tone of voice, escalation rules, and every FAQ your team currently answers by hand.

No changes to your PMS, your CRM, or your reception workflow.

02. WALK

Months 1–3

Live system. Real data.

The AI handles inquiries across your configured channels. Your team receives only vetted, qualified leads. We run a 30-day review together: what's working, what needs refining, what the data shows.

Deliberately intentional. We learn how your practice actually runs before proposing anything more.

03. RUN

Month 3 onwards

Managed optimisation.

Monthly performance review and script refinement. Conversion tracking from inquiry through to consultation and treatment start. Optional expansion to additional channels. Lapsed patient reactivation when you are ready.

“Isn’t this just a chatbot?” No. Here’s the distinction worth understanding.

It’s the first question every surgeon asks. And it’s the right one.

A chatbot

A decision tree.

Scripted paths. Scripted answers. If a patient asks something outside the designed route, they hit a wall: “I’m sorry, I don’t understand your question.” The conversation ends. The lead is gone.

Optimised to deflect.

Feels like a FAQ page that talks.

CareConcierge

A conversational agent.

It has one goal: booking a consultation. Everything else serves that. If a patient goes off-script, it answers and steers them forward. The conversation never hits a wall.

Optimised to convert.

Feels like your best coordinator.
At 11pm on a Sunday.

The guardrails are clinical, not conversational.

Every response is built from your FTC/HIPAA-reviewed practice content. CareConcierge will never speculate about surgical outcomes, quote fees out of context, or use restricted language. The intelligence is real. The compliance is absolute.

Your most valuable patients already know you. They just went quiet.

Every practice has them. Patients who enquired, requested a consultation, showed genuine intent — and then went silent. Not because they chose someone else. Because life got in the way, the timing wasn't right, or nobody followed up before the moment passed. They are sitting in your system right now. Warm, qualified, and waiting to be asked again.

What CareConcierge does with them

A structured reactivation sequence runs automatically to your lapsed patient list — personalised, compliant, calibrated to your tone. Not a bulk email blast. A considered conversation that picks up where you left off.

“We haven’t heard from you in a while. Your consultation is still available whenever you’re ready. Here’s how to get back in touch.”

These patients have already chosen you. They’ve done the research. The barrier to re-engagement is low — but only if someone reaches out. CareConcierge does it automatically, at scale, without adding a single task to your team.

The maths are disproportionate.

A mid-size practice with 200 lapsed enquiries in the last 18 months, converting at 12% through reactivation, recovers 24 consultations.

At \$20,000+ average case value, that’s \$480,000 in protected revenue — already sitting in your system. Untouched.

CareConcierge finds it. While you’re in theatre.

We are taking ten practices this quarter. That is the entire first United States cohort.

Direct access to the founding team

Greg, Oli, and Pouria — not a support queue. You have the principals.

Conversion Intelligence included from month one

Every month you receive a full report: enquiries handled, consultations generated, estimated revenue protected.

Your practice shapes the product

Feedback from the first ten directly informs the platform roadmap. You are building this with us.

A credentialed ASPS co-founder as your peer reference

Dr Pouria Moradi is available for direct, peer-to-peer conversations. No sales pitch. Surgeon to surgeon.

Schedule your consultation

A 30-minute conversation. No obligation, no pitch deck to sit through. We ask about your current enquiry flow, explain exactly what the system does and doesn't do, and you decide.

Schedule a Meeting

<https://calendly.com/greg-careconcierge/30min>

A woman with long dark hair is sitting on a bed in a dimly lit room at night. She is wearing a dark turtleneck sweater and is looking down at a smartphone in her hands. The room is dark, with light coming from a window on the left, showing a view of city lights at night. The text is overlaid on the left side of the image.

**Your coordinator was at her daughter's soccer game.
Her rhinoplasty enquiry was not.**
